PROFESSIONAL EXPERIENCE

Software Engineering Intern, VN Code Pro 	19/05/2026 – 04/06/2026 Surat
Domain: AI Development	
- Developed the "VN Code Pro Blog Bot" , a fully autonomous AI blog generation pipeline built with Python and FastAPI to write, fact-check, and publish SEO-optimized content. - Designed structured prompts for training secondary AI models, performed extensive website testing, reported bugs, and actively contributed to core system improvements. - Integrated Groq (Llama 70B) for search trend analysis and Google Gemini 2.5 Flash for long-form content generation, backed by Tavily web searches and custom site crawlers for rigorous fact-checking. - Engineered an automated quality control system for surgical AI edits and a robust custom API key manager featuring automatic rotation and exponential backoff to seamlessly handle rate limits. - Successfully connected the backend to a Supabase database and a custom CMS API, ensuring real-time syncing and automated publishing.	

EDUCATION

Master of Science (MSc) in Information Technology, <i>The Maharaja Sayajirao University of Baroda (MSU)</i> Currently Pursuing – 2nd Year, 3rd Semester CGPA: 6.66 (through 2nd Semester)	07/2025 – Present Vadodara, Gujarat
Bachelor of Science (BSc) in Information Technology, <i>Natubhai V. Patel College of Pure & Applied Sciences (CVM University)</i> Grade: 8.45 CGPA	07/2022 – 05/2025 Anand, Gujarat
Higher Secondary Education, Ashadeep Vidhyalay Percentage: 55%	06/2020 – 03/2022 Surat, Gujarat

SKILLS

Programming Languages	Frameworks & Libraries	Databases & ORM	Tools & Infrastructure
C++, C#, Java, Python, TypeScript, JavaScript	React, Next.js, ASP.NET, FastAPI, Tailwind CSS	PostgreSQL, MySQL, SQL Server, Supabase, Prisma ORM	Git/GitHub, Vercel, Gemini API, Groq, PyInstaller

PROJECTS

PNP CRM [🔗](#) , *Live Client Project | Next.js, TypeScript, Prisma ORM*

- Engineered and deployed a full-stack CRM platform currently in active production for an interior design client.
- Designed a scalable database architecture with Prisma to manage the customer lifecycle, PDF quotation generation, and financial tracking.
- Integrated NextAuth.js for role-based access control and implemented interactive Kanban boards and data visualization dashboards.

FinTeam [🔗](#) , *Finance As A Service | Next.js, TypeScript, PostgreSQL (Neon), Gemini API*

- Engineered a dual-purpose platform featuring a marketing site with a custom AI chatbot and a secure SaaS-style admin dashboard.
- Integrated Google's Gemini AI to automatically generate context-aware email drafts for incoming leads.
- Implemented custom session-based authentication using bcryptjs and built business analytics dashboards using Recharts.

Furnish & Florish [🔗](#) , *ASP.NET, C#, CSS*

- Developed a responsive web application for the furniture and interior domain using ASP.NET [🔗](#) and C#.
- Designed a responsive and engaging frontend user interface using pure CSS.
- Managed source code and version control efficiently through GitHub.

Furniture_management_app [🔗](#) , *Furniture Management System | VB.NET, WinForms, SQL Server*

- Developed a robust Windows desktop application to streamline furniture business operations and inventory management.
- Implemented a billing system with automated calculations and generated .rdlc reports for invoices and stock tracking.
- Engineered secure user authentication and integrated a local Microsoft SQL Server database for reliable transaction handling.

Print-any-folder-and-file [🔗](#) , *Project Structure Generator | Python, PyQt5, PyPDF2*

- Developed a modern desktop application utilizing Python and PyQt5 to generate visual directory trees and extract file contents for LLMs.
- Engineered robust text extraction for 100+ file extensions and PDFs, incorporating smart-ignore logic for build outputs.
- Implemented one-click clipboard/export functionality and packaged the app as a standalone Windows executable.
